I am writing this note in reference to the new broadcast service known as LPFM. I am concerned about my K-LOVE station. I have moved a couple of times in the past few years and have been able to pick up that station through the various locations that carry this national radio station. This is one of the only stations I have been able to find that is completely wholesome and uplifting to listen to. In traveling from state to state when I found the station carrying KLOVE I felt a sense of connectedness and at home. I have always believed that KLOVE and it's encouraging message does nothing but good in the community. It is uplifting and positive which most stations severely lack. I think it will be a tragedy for these station to be shut down because of new laws and legislation for other services. This station is a vital part of many, many peoples lives. This station has done pledge drive after pledge drive so that they could keep every single station broadcasting. It would be a shame if all the people that rose up and backed this station were disappointed because after all the contributions and work that the station had done that in the end of the government stepped in and made it impossible for them to get their KLOVE signal. Please take these thoughts into consideration before you make any final decisions regarding this proposal. Thank you for listening. Sincerely, Laura Carson, Jonesboro, AR
